Virtual CISO

Strategy, governance and cyber risk through an on-demand CISO embedded in your organisation

OBJECTIVE

Bring CISO expertise into decisions without a full- time internal role

The vCISO provides independent leadership to organisations that must govern risk, investment and compliance.

Working with management and technical teams, it turns security needs into sustainable priorities.

METHOD

Assess maturity, define the roadmap and **govern execution**

Assessment

We measure maturity, risk and gaps against frameworks such as NIST CSF.

Strategy

We define objectives, roadmap, budget, ownership and indicators.

Governance

We coordinate initiatives, suppliers and reporting and verify results over time.

DELIVERY

Risk, policy, compliance, suppliers and incident readiness

The service covers governance, risk management, architecture, vulnerability management and business continuity.

The vCISO supports audits, customers, boards and regulators with consistent evidence and communication.

Frequency adapts to business maturity, from regular checkpoints to continuous operational presence.

KEY STRENGTHS

**Independent vision,
multidisciplinary
experience
and flexibility**

Leadership

A senior owner aligns security, business and management accountability.

Method

Recognised frameworks and decisions based on risk, impact and priorities.

Scale

Specialist skills activated when needed without a fixed structure.

OUTPUT

Clear direction for investment, risk and **improvement**

Maturity assessment with current state and key gaps.

Cybersecurity roadmap with priorities, owners, timing and budget.

Risk register and KPIs tracking residual risk and results.

Board reporting that is clear, regular and decision-oriented.

Let's **HACK** together
